PROFILE

Enthusiastic Java developer with a strong foundation in Java and SQL, focused on building efficient, scalable applications. Brings 6 months of experience as a catalog associate, managing product data across Shopify, Newegg, and Walmart marketplaces, optimizing catalogs, and generating sales reports. Proficient in SQL, Excel, and Power BI for data analysis and process optimization.

EXPERIENCE

Catalogue Associate

Wissend Consultancy Services, Chennai

Feb 2024 - Jul 2024

- Managed and optimized product catalogs across Shopify, Newegg, and Walmart, ensuring accurate product data, pricing, and inventory levels.
- Utilized SQL to generate and analyze sales reports, identifying key trends to support catalog enhancements and performance improvements
- Collaborated with cross-functional teams to synchronize product listings, maintaining consistency and accuracy across multiple e-commerce platforms.
- Leveraged Microsoft Excel and Power BI to create insightful reports and dashboards, driving data-informed decisions and improving operational efficiency.

Technologies Used: MS Excel and Power BI

PROJECT

VEHICLE RENTAL MANAGEMENT SYSTEM

Mar 2025 - May 2025

- Developed a Java application for managing vehicle rentals (bikes, cars, trucks).
- Enabled users to view and select vehicles by brand and model.
- Implemented license type verification to filter eligible vehicle categories.
- Processed bookings and calculated rental charges based on vehicle type and duration.
- Generated detailed receipts after successful bookings.
- Designed with a user-friendly interface and modular code for easy maintenance.

Tools Used: Java

BANK MANAGEMENT SYSTEM

Jan 2025 - Mar 2025

- Developed a Java-based banking application simulating core functionalities: balance check, deposit, withdrawal, and receipt printing.
- Enabled users to manage account details, including phone number and ATM PIN updates.
- Implemented robust user authentication and input validation for enhanced security.
- Ensured data integrity and system efficiency throughout all operations.
- Designed with a modular structure for maintainability and seamless user experience.

Tools Used: Java

TOURS AND TRAVEL MANAGEMENT SYSTEM

Sep 2023 - Oct 2023

- Designed a website to showcase India's tour packages categorized by type (educational, orientation, etc.).
- Implemented secure user login for personalized package booking.
- Built an admin dashboard to manage and process user requests efficiently.
- Developed an intuitive interface for users to explore and select tour options.
- Ensured smooth functionality through secure booking and admin management.

Tools Used: HTML, CSS, PHP and MYSQL
